

# YOU MAY NOT BE READY FOR A DISASTER ... BUT WE ARE.

When a sudden natural disaster or an unexpected event affects your property, the results can be devastating. Our team of experts at Blackmon Mooring & BMS CAT is skilled in providing interior and exterior natural disaster recovery services to residential and commercial properties. We are dedicated to delivering reliability, quality, and superior disaster restoration services.

## WE OFFER THE FOLLOWING COMMERCIAL DISASTER RECOVERY SERVICES:

### Emergency Repairs

Our crew will perform any emergency repairs that are needed to ensure structural integrity, for our team's safety, and to prevent further damage. From structural fixes to boarding up windows, our emergency services will ensure everyone is safe as we begin the restoration process.

### Controlled Demolition

Our demolition experts can perform controlled demolition of compromised parts of the building's structure, leaving the undamaged sections intact. This keeps the costs down and moves the project along faster.

### 24/7 Response

Our emergency response teams work 24/7/365, because we know disasters don't strike just when it's convenient, and cleanup can't always wait for regular business hours. We also know that when it comes to commercial restoration, a rapid response is critical for recovery.

### Insurance Company Coordination

We work with most major insurance companies. Through the relationships we have developed, we are happy to provide support and coordination to make the claims process as smooth as possible.

**RESTORE. REBUILD. RECOVER.**
